

# **MAP**

## **KEYS & REMOTES**

### **Programming instructions for KF135 / KF136**

**To program the remotes you will need to have all the remotes available for the car as you will need to relearn them all.**

1. Sit in the vehicle with the doors closed
2. Turn key to the ACC position and press the rear demister button 3 times, within 5 seconds, doors will now lock.
3. You then press a button on the first remote to be trained, the door locks will cycle.
4. Then press a button on the 2<sup>nd</sup> remote to be trained and the door locks will cycle again.
5. Repeat this step for the rest of the remotes to be trained to the vehicle (if applicable). You can train up to 8 remotes.
6. Turn the ignition to the OFF position to exit the learning mode
7. Your remotes are now programmed to the vehicle.

**WARNING!** This remote control contains a button/coin cell battery. It is a lithium button/coin cell battery. If swallowed or placed inside any part of the body, a lithium battery can cause severe or fatal injuries within 2 hours or less. The battery is hazardous and should be kept out of reach of children at all times whether new or used. If you think batteries may have been swallowed or placed inside any part of the body, seek medical attention immediately or contact the Australian Poisons Information Centre on 13 11 26 or the New Zealand National Poisons Centre on 0800 764 766.
